iVision Named to Inc. Magazine List of Fastest-Growing Companies for Second Consecutive Year

iVision, Inc. Ranks No. 69 for IT Services and No. 753 overall on Inc. 500 | 5000

NEW YORK, September 1, 2010 5pm (EST) - Inc. magazine ranked iVision NO. 69 for the IT Services Category, and NO. 753 overall on its 29th annual Inc. 500 | 5000 list; an exclusive ranking of the nation's fastest-growing private companies. iVision joins a select group of companies nationally with consecutive appearances on the renowned Inc magazine list, after being ranked NO. 473 in 2009.

Now in its 7th year of operation, iVision – an Atlanta based technology solutions company - is the 2nd fastest growing IT Services Company in Atlanta. Considering that Atlanta, GA is the 6th most competitive market for private companies, iVision is proud of their past success and excited about their future outlook.

Focused on both infrastructure and applications solutions for medium and enterprise companies, iVision's success is heavily tied to its 100% customer retention rate. The organization's client focus, transparency and flexibility in creating win-win partnerships, and its investments in expertise and next generation technologies, have provided iVision differentiation and an advantage to grow in a challenging economic climate, which has forced many companies to postpone further investments in technology.

In a recent open letter discussing the value of companies' growth despite challenging economic times, Inc. Magazine Editor Jane Berentson commented; "Growing at all during these past few years of recession, frozen credit, uncertain markets, and depressed business and consumer spending is noteworthy, growing fast verges on incredible".

Upon learning of iVision's recognition as a 2X Inc. 500 | 5000 company, iVision CEO Gabe Damiani commented, "iVision's refined customer approach and delivery framework grouped with our consultant's broad technical expertise and seasoned experience create a recipe for success. Our understanding of today's IT challenges as well as emerging next generation technology assures our clients that our solutions will continue to deliver real value moving forward."

iVision COO David Degitz also commented, "While we are pleased by our past success, we're certainly more excited about our future prospects. iVision will continue to stand out to prospective clients in today's environment where there is limited economic visibility and where organizations' expectations for options with technology solutions (project based, post project support and project services) have increased. As we enter our fourth quarter, iVision is trending towards a 60+% growth rate over 2009. We are looking forward to 2009.

About iVision

iVision, the technology integration and management firm, was founded in 2004. Headquartered in Atlanta, iVision designs, selects, builds and manages next-generation IT infrastructures and application solutions. Between 2004 and 2010, the firm has experienced exponential growth, increasing annual revenue by more than 6,900 percent. The firm engineers success for its clients through objective recommendations, delivery expertise, best-of-breed guidance and a diverse network of partners.
