iVision Company Overview

iVision is a technology integration and management firm that is transforming how technology does business. iVision engineers success for its clients through objective recommendations, process and technology expertise, as well as best-of-breed guidance. The firm provides infrastructure and application solutions, and it is organized into five complementary practices, including: Infrastructure Services, Data Center, Converged Network and Application Development - all supported by the Delivery Assurance practice.

Founded in 2004, iVision is a privately held company, headquartered in Atlanta. It enjoys 100 percent customer retention to date, which has significantly contributed to 28 consecutive profitable quarters. iVision was listed on the renowned Inc. 500/5000 ranking of the fastest-growing private companies in the U.S. both in 2009 and 2010. The annual ranking listed iVision as the 61st fastest-growing company in the IT Services category nationally.

iVision's on-site datacenter lab is one of the most sophisticated in the Southeast. It provides a testing ground for game-changing technologies, allowing its engineers to experiment in a laboratory setting prior to deploying new, innovative technology solutions for its clients. The laboratory is a tangible manifestation of iVision's engineering-centric company culture and philosophy.

The firm collaborates with a diverse network of alliance partners, including Cisco, NetApp, VMWare, HP, EMC2, Microsoft, Symantec, Data Domain and Quantum. This range of partnerships enables iVision to provide unbiased, objective recommendations to help clients select, design, build and manage next-generation IT infrastructures and applications that are the best fit for their businesses.
