

Application Packaging

The Challenge:

“Organizations that don’t dedicate the right resources to packaging will fail at software distribution.”

Gartner

With the vast number of applications managed by a typical company’s IT staff, quality application packaging and software delivery is essential to maintain a stable desktop environment. Some of the challenges that companies are facing today around software packaging include but are not limited to:

- **High Cost:** Packaging software for distribution is not a competitive differentiator for an organization and is a very expensive resource to have on staff full-time.
- **Technical Difficulty:** Packaging software for distribution can be very technical when vendors leverage different standards and/or allow for different degrees of customization or automation with their software.
- **Lack of Standards:** Smaller software vendors who are focused on basic solutions do not deliver quality installations out of the box and lack packaging standards.
- **Quality Assurance:** Unit and Integration testing between desktop applications is difficult and, often times, ineffective in identifying potential conflicts before an application is released into production.
- **Patch Management:** Keeping up with patches on a monthly basis can be a challenge for IT staff.
- **Efficiency:** The time it takes a typical software packager to research, package and unit test a software release can be a very inefficient process.

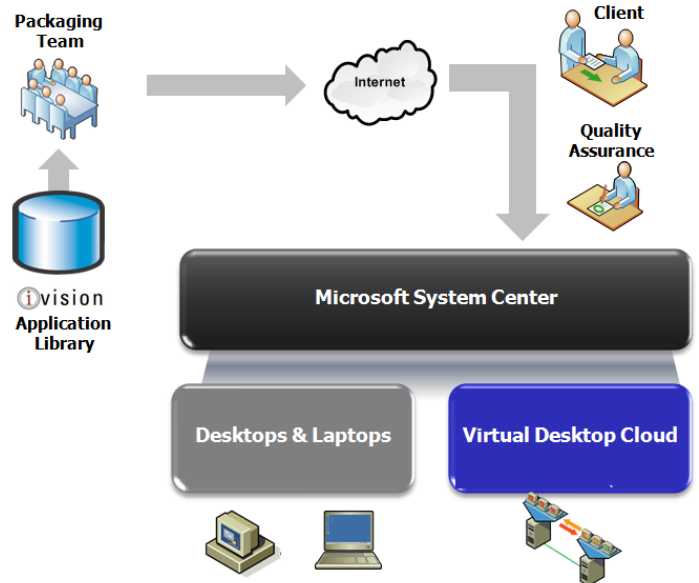

The Solution:

Today, organizations are presented with a wide variety of application delivery solutions to provide their users with the tools that they need to accomplish their daily workload. Solutions like SMS, System Center Configuration Manager or Essentials, Microsoft SoftGrid, Altiris Software Delivery, Citrix Application Publishing, or VMWare Application Virtualization each have their own application preparation methodology. iVision’s staff has the experience to prepare your applications for deployment across the spectrum of deployment technologies, leaving your staff to manage your critical business operations.

- Vast experience with traditional industry standard tools: (e.g. AdminStudio, Wise Package Studio)
- Established experience with Application Virtualization toolsets with Microsoft SoftGrid and VMware ThinApp
- Onsite and remote packaging solutions to fit your business needs.
- Best practices/standards based packaging approach.
- Full application lifecycle testing (deployment, upgrades, retirement).
- Onsite training opportunities with our experienced staff.

Approach:

We take the following approach to Introduction an application package into your environment:

Application Packaging

Benefits:

We have 200-plus pre-packaged applications from various software vendors in the **iVision Application Library** and it grows each week as we continue to package software for various businesses and organizations. See below for a sample of some of the vendors:

- ✓ Aderant
- ✓ Adobe Systems
- ✓ AIA
- ✓ Ahead Software
- ✓ AlphaSmart
- ✓ Altiris
- ✓ American Institute of Architects
- ✓ APCO Graphics, Inc
- ✓ Apple Computer
- ✓ Autodesk, Inc.
- ✓ Best Case Solutions
- ✓ Business Objects
- ✓ Captaris
- ✓ CaseCentral
- ✓ Cisco Systems
- ✓ Citrix Systems
- ✓ Collier
- ✓ Concordance
- ✓ Corel
- ✓ CT Summation
- ✓ Cyberlink
- ✓ Dameware Development
- ✓ DataViz
- ✓ Dell
- ✓ DeLorme
- ✓ Document Automation
- ✓ DocuLex
- ✓ eCopy
- ✓ Elite Information Systems
- ✓ Estate Valuations & Pricing Systems, Inc
- ✓ Executive Software
- ✓ Fenestrae
- ✓ FileMaker
- ✓ Folio Corporation
- ✓ Genifax
- ✓ Good Technology
- ✓ Google
- ✓ HP
- ✓ IBM
- ✓ Inmagic
- ✓ Interface Software
- ✓ Intervideo
- ✓ Interwoven
- ✓ Intuit

- ✓ IPRO Tech
- ✓ Korbitec Holdings
- ✓ Kroll
- ✓ Lavasoft
- ✓ LegalKey
- ✓ Levit & James
- ✓ Lexis Nexis
- ✓ Litigation Dynamics, Inc.
- ✓ LiveNote
- ✓ Macromedia
- ✓ Micron Systems, Inc.
- ✓ Microsoft
- ✓ Milum Corporation
- ✓ Minisoft, Inc.
- ✓ Net2Phone
- ✓ OMT00L
- ✓ OpenText
- ✓ Payne Group
- ✓ Quark
- ✓ RealLegal
- ✓ RIM
- ✓ Safer Networking
- ✓ Sage Software
- ✓ ScanSoft
- ✓ Soeperman Enterprises
- ✓ SoftPro
- ✓ Soundpath
- ✓ StarLaw
- ✓ Stedman's
- ✓ STF Services
- ✓ Summation Legal Technologies
- ✓ SunGard
- ✓ Sun Microsystems
